## SKILLS:

---

JavaScript, HTML5, CSS3, Bootstrap, Sass, React, Redux, Vue.js, jQuery, GitHub, Axios, Mongoose, MongoDB, MySQL, Node.js, Express, Python, AWS, Figma

## Work Experience:

---

**Front End Developer at Y LIFT**, New York, NY

March 2022 - June 2022

*Y LIFT STORE is an e-commerce platform for aesthetic products, online courses, and live interactive trainings for licensed medical providers.*

- Improved web UX and UI design, functionality, and responsiveness for better user experience.
- Added new specialty field to registration section from frontend to backend, which helped sales promote products to targeted medical providers more efficiently.
- Created component for real-time popup promotions during live streaming, which are activated by moderator at key moments to enable participants to purchase related products, by using Vue, JavaScript, Amazon Chime SDK. This feature increased sales during live streaming.
- Added a new TRAINING page to meet existing customers' demand and recruit new customers.
- Added technical issues instruction tab and popup model to help customers troubleshoot independently.
- Deployed website from development to production using GitHub and AWS CodePipeline.

## WEB PROJECTS:

---

*All projects listed below were developed by me from initial concept design to implementation*

### Social Media for Architects

<https://polar-lake-72517.herokuapp.com/>

- React, Sass, Redux, MongoDB, Mongoose, Axios, Express, Node.js
- A responsive full-stack social media platform, like an Instagram specially designed for architects' community

### Travel Destination Inspiration Website

<https://jackie-github.github.io/on-the-road/>

- React, Bootstrap, SASS, Axios
- A responsive website that queries weather API and YouTube Data API based on users' interested travel destinations.

### Memory Game Website

<https://jackie-github.github.io/memorygame/>

- React, Sass, Redux
- A responsive single page website application, based on classic memory game.
